

S/N	Name		Students' comments	Areas for improvement.
1	Alistair Ong Nai Hian		He challenges us to think beyond. He loves what he does and wants to make sure we do as well. If we have any queries we can turn to him for help and he will gladly help and spend much of his time trying to help us solve the problem.	Slow down to teach all basics as time is needed to absorb new information.
2	Alvin Lee Wei Jie		He challenges me to think critically and not just learn merely matter of facts and formulas in Math. He is really passionate about Math and imparts his knowledge readily to us. Math learning is not restricted by curriculum as he gives enrichment. Enrichment activities help me have a better grasp of maths as a whole :D :D	
3	Baladashyalan Rajandran		He is very enthusiastic and passionate in making us understand the topics we learn, instead of just telling us to memorize things blindly. He clearly explains concepts and ideas which I do not understand in a way such that I am able to understand it. He is able to make you truly appreciate the beauty of Maths and inspire me to want to learn it.	
4	Choi Wi Su		He is willing to attend to students' needs. He uses slightly different style of teaching which I find more useful to understand Maths. Not boring, ha ha..	
5	Gilbert Chng Yu Jie		Very passionate, he is not satisfied with piecemeal explanations, he thinks through thoroughly. Very knowledgeable - bordering on encyclopedic. Very high standard of work and dedication to duty, providing a lot of enrichment in class which I've never found in a Math teacher before.	Skips steps, slower students may end up confused.
6	Huang Ze Ming Benjamin		He is willing to listen to what students have to say and relates Mathematics to real-life situations. He teachers very personally and tries to understand student's problems.	
7	Jeremy Angelo		He is very passionate in teaching. He always teaches whole heartedly. He always gives us enrichment to let us better understand and appreciate the mathematical concepts introduced. He also wants to takes his time to help us personally outside lesson time. He tells stories of applications of mathematical concepts in real life to instil or trigger an interest or passion for Mathematics for each of us.	

8	Julius Lauw		The lessons are very interesting and he usually teaches us using concepts related to the syllabus. He also shows a lot of concern for the students and tries to provide 1 to 1 help as much as possible, He also encourages students to understand the concepts and formulas instead of memorizing them.	
9	Lai Yann Ting		He puts in a lot of effort into ensuring that students are taught through understanding, not just by memorizing. He applies concepts taught in class to real life situations, that make lessons very interesting. He encourages us to learn independently and not limit the study of Maths to just classroom setting.	Sometimes pace is too fast.
10	Lim Chun Loong Jason		He is passionate in his teaching. He encourages his students to understand Mathematics and not only learn how to apply formulas. He makes lessons interesting and provides students with enrichment.	
11	Liu Zhi Jun Chantal		He delivers an in-depth lesson on each topic and explores interesting mathematical concepts. His questions require thinking and not mere memorizing of methods / formulas. He is very passionate and goes the extra mile to teach us things we would like to learn (e.g. relating what we learn to daily life).	
12	Ng Jiaming Jeremy		He not only manages to help the class with Maths, but also helps the class to bond better. He keeps the class in high spirits which helps teens like us to learn. Real life examples and applications are also given to show us how the Math concepts we learn can be applied. He is always patient and willing to help.	
13	Ong Jun Wei Joshua		He wants to ensure that his students gain a complete understanding of the math concepts taught in class, making sure students have a solid foundation which would be crucial in further studies on Math.	
14	Ong Tze Lin Edwina		He is passionate about Mathematics and it shows in his teaching. He is willing to spend time outside lesson to help weaker students. He is willing to answer questions that students are curious about even if they are out of syllabus.	Focus on how formulas can be applied to different types of questions.
15	Pang Ka Wai		He is a very passionate teacher. He makes Math lessons interesting. He is always punctual for class.	

16	Rathinakumar Akshaykumar		Ability to make you understand a mathematical concept despite being complex. Very knowledgeable in Mathematics, knows various interesting phenomenon that occur in Maths. Instead of knowing what the law is, he helps us to understand how the law works Mathematically which helps us in our work.	
17	Ryan Lee Jin Hern		He is very knowledgeable in Maths. He is a quite interesting person. He makes Maths lessons exciting and makes sure that we do well. He is strict with work (assignments).	Slows down in explaining difficult questions.
18	Samantha Baey Khai Lee		Very knowledgeable in what he teaches and does a thorough job in explaining how various formulas & equations come about. By understanding the proofs of the formulas we are therefore able to have a better grasp and appreciation of the subject matter, He tells real-life stories and links concepts to daily life. This makes the application of Math and understanding even stronger and makes the class more interesting and enjoyable.	Certain proofs of formulas are too high level and I'm lost sometimes.
19	Sean Lam Jing Long		He does his best to help us understand how the formulas we learn work, instead of just blindly memorizing. He is readily available, even outside lesson time, to explain and help with any Math problems on an individual basis. He gives a lot of enrichment that helps us to apply the concepts we learn in the classroom.	
20	Sim Wei Shan		He is very helpful and when I approach him to ask questions that I don't know, he will be very passionate about answering my queries, Also, he does not just give us the formulas and let us memorize but he explains how they comes about which makes us understand better about the concept of the topic. I really enjoy his lessons because they are very enriching.	
21	Sim Wei Wen Zechariah		Ability to branch out into other areas relevant to Mathematics. Creates a lively and engaging lessons with students. Understands and is able to explain the topics at hand.	Just one. Influencing more students to further explore Mathematics.
22	Rey Tan Yi Chong		Very concerned about his students' understanding of this teaching and doesn't hesitate to spend time to help them if needed. Sometimes he adds stories into lessons so that they become more interesting & students fall asleep less.	

23	Ulaganathan Arun Karthik		He shows us how are formulas derived which helps in understanding. He links different topics together, showing how things we learnt in secondary school are still useful now. Sometimes the stories he shared are a welcome break from a long lesson.	Perhaps he could state some real life applications of what we are learning e.g. complex numbers, because sometimes it's easier to understand if a real life example is shown.
24	Wang Jiehao		Real-life application in using different mathematical ideas. Further development of mathematical topics instead of only sticking to the syllabus. Very patient - spends time clearing doubts instead of rushing through syllabus.	
25	Lee Joseph		Very helpful, gave me extra exercises and offered to make-up lessons I missed. He goes to great extend to make sure that his students understand what has being taught. He is humorous and makes lessons fun.	Hope his students stop complaining about his enrichment as I'm interested but he does not go through them all the time.^

^Joseph cancels it after writing them
